### 01 Local SEO & Google Maps Ranking

MONTHLY

Monthly Recurring

**Price: INR 4,000/mo (Basic) — INR 8,000/mo (Advanced)**

■ Time Investment: ~10–15 hrs/month (Basic) · ~20–25 hrs/month (Advanced)

|              |                                                                                                                                                                                                                                                                              |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tools Used   | Google Search Console, Google Business Profile Manager, SEMrush / Ubersuggest (keyword research), Whitespark / BrightLocal (citation building), Canva (post graphics)                                                                                                        |
| Timeline     | Setup: 3–5 days   First results visible: 4–8 weeks   Strong ranking: 3–6 months                                                                                                                                                                                              |
| What We Do   | We claim/optimize your Google Business Profile, research local keywords (e.g. 'hotels near Vrindavan'), build citations on Justdial, Sulekha, IndiaMart, Yelp etc., post weekly updates, manage & respond to reviews, and send you a monthly report with rankings & actions. |
| Deliverables | Google Business Profile optimised · 8–12 local citations submitted · 4 weekly posts (text + image) · Review request templates · Monthly rank-tracking PDF report · Competitor analysis (Advanced tier)                                                                       |

### 02 Meta Ads & Lead Generation

MONTHLY

Monthly Recurring

**Price: INR 6,000/mo (Basic) — INR 15,000/mo (Full Management) + AD SPEND (client pays separately)**

■ Time Investment: ~15–20 hrs/month (Basic) · ~25–35 hrs/month (Full Management)

|              |                                                                                                                                                                                                                                                                                                                                                         |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tools Used   | Meta Business Suite, Meta Ads Manager, Canva Pro / Adobe Express (creatives), Google Sheets (lead tracker), WhatsApp Business API / lead forms, Pixel integration                                                                                                                                                                                       |
| Timeline     | Campaign live in: 2–3 days   First leads: 3–7 days   Optimised performance: 2–4 weeks                                                                                                                                                                                                                                                                   |
| What We Do   | We create ad graphics, write Hindi/English copy, set up Facebook & Instagram campaigns targeting your local area (Vrindavan + nearby cities like Mathura, Agra, Delhi), integrate WhatsApp or lead forms, monitor daily and send weekly reports. Ad spend budget is SEPARATE — you pay Meta directly. Recommended minimum ad spend: INR 3,000–5,000/mo. |
| Deliverables | 2–4 ad creatives/month (image + copy) · Campaign setup & targeting · WhatsApp click-to-chat or lead-form integration · Weekly performance report (impressions, clicks, leads, cost/lead) · A/B testing (Full tier) · Retargeting campaigns (Full tier)                                                                                                  |

### 03 Website & Landing Page Development

ONE-TIME

One-Time (+ optional hosting retainer)

**Price: Landing Page: INR 8,000 | 5-Page Website: INR 12,000–18,000 | Full Custom: INR 20,000–25,000 | Domain: INR 800–1,200/yr (you pay) | Hosting: INR 3,000–6,000/yr (you pay) | Maintenance: INR 1,500/mo (optional retainer)**

■ Time Investment: Landing Page: ~20–25 hrs | 5-Page Website: ~35–45 hrs | Custom: ~55–80 hrs

|              |                                                                                                                                                                                                                                                                                                                                                   |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tools Used   | Next.js / React or WordPress, Vercel / Hostinger / Namecheap (hosting & domain), GitHub (code repo), Cloudflare (DNS + CDN), Google Analytics, WhatsApp chat widget                                                                                                                                                                               |
| Timeline     | Discovery & design: Day 1–2   Development: Day 3–10   Review & revisions: Day 11–12   Domain+hosting setup: Day 12–13   Live: Day 14                                                                                                                                                                                                              |
| What We Do   | We build your website using modern tech (fast, mobile-friendly), buy and connect your domain (e.g. yourhotel.com), deploy to hosting server, connect Google Analytics, install SSL, add WhatsApp chat widget, and hand over with training on how to share/update content. Domain & hosting costs are passed to you at actual price — no markup.   |
| Deliverables | Live website on your domain · Mobile-first responsive design · WhatsApp & call button · Lead capture form · Basic on-page SEO (meta tags, sitemap, robots.txt) · Google Analytics connected · SSL certificate (HTTPS) · Domain purchased & DNS configured · Hosting deployed & connected · 1 round of free revisions · 30-day post-launch support |

### 04 Social Media Content & Reels

MONTHLY

Monthly Recurring

**Price: INR 6,000/mo (12 posts) — INR 10,000/mo (20 posts + 4 reels) — INR 12,000/mo (full package)**

■ Time Investment: Basic (12 posts): ~18–22 hrs/month | Full (20 posts + 4 reels): ~30–38 hrs/month

|              |                                                                                                                                                                                                                                                                                                                                          |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tools Used   | Canva Pro (graphics & reels), CapCut / InShot (video editing), Meta Business Suite (scheduling), Instagram, Facebook, Google Business (posting platforms)                                                                                                                                                                                |
| Timeline     | Onboarding & content calendar: 3 days   First post: within 5 days   Full month content delivered: by 3rd of each month                                                                                                                                                                                                                   |
| What We Do   | We create all visuals and videos using your photos/videos (or stock), write captions, research hashtags, build a monthly calendar and post on Instagram + Facebook on your behalf. You approve the calendar on the 1st of each month. Platforms covered: Instagram, Facebook. YouTube Shorts optional as add-on.                         |
| Deliverables | Monthly content calendar shared on 1st · Static posts (festival, offers, behind-the-scenes) · Reels (property tour, food, testimonials) · Captions in Hindi + English · Hashtag research & sets · Festival campaign creatives (Holi, Janmashtami, Diwali etc.) · Posted & scheduled on Instagram + Facebook · Monthly engagement summary |

### 05 WhatsApp CRM & Automation

ONE-TIME +  
RETAINER

One-Time Setup + Monthly  
Retainer

**Price: Setup: INR 10,000 (one-time) | Monthly maintenance & updates: INR 2,000/mo | Advanced flows (extra automation): INR 3,000–8,000 per flow**

■ Time Investment: Setup: ~15–20 hrs (one-time) | Monthly maintenance: ~4–6 hrs/mo

|              |                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tools Used   | WhatsApp Business API (via Twilio / WATI / AiSensy), Google Sheets (lead database), Make.com / Zapier (automation triggers), WATI dashboard (broadcast & analytics)                                                                                                                                                                                                                                                                 |
| Timeline     | API approval & setup: 2–3 days   Flow building: 3–4 days   Testing & go-live: Day 6–7   Full system live: within 1 week                                                                                                                                                                                                                                                                                                             |
| What We Do   | When a customer messages your WhatsApp, they immediately get an auto-reply. Their details go into a Google Sheets CRM. If they don't respond, follow-up messages are sent automatically at Day 1, Day 3, and Day 7. You can send festival offers or promotions to your entire contact list via broadcast. You see all leads in a live dashboard. Monthly retainer covers system health checks, new template creation & 1 broadcast. |
| Deliverables | WhatsApp Business API connected · Auto-reply to new enquiries (within 30 sec) · Multi-stage follow-up sequences (Day 1, Day 3, Day 7) · Lead status tagging (New / Interested / Booked / Dead) · Broadcast templates for offers & festivals · Google Sheets CRM dashboard · Monthly broadcast planning (1 campaign/mo included)                                                                                                     |

### 06 Branding & Creative Design

ONE-TIME

One-Time Project

**Price: Logo Only: INR 3,000–6,000 | Brand Kit (logo + colors + fonts + guidelines): INR 8,000–15,000 | Full Branding Package (kit + templates + print): INR 18,000–35,000**

■ Time Investment: Logo Only: ~8–12 hrs | Brand Kit: ~20–28 hrs | Full Package: ~40–55 hrs

|              |                                                                                                                                                                                                                                                                                                                      |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tools Used   | Adobe Illustrator / Canva Pro (logo & graphics), Adobe Photoshop (mockups), Canva Brand Kit (template system), Figma (style guide)                                                                                                                                                                                   |
| Timeline     | Brief & mood board: Day 1–2   Logo concepts (3 options): Day 4–5   Revisions: Day 6–7   Final files: Day 8–10   Templates: Day 10–14                                                                                                                                                                                 |
| What We Do   | We start with a brand brief (your preferences, competitors, target audience). We present 3 logo concepts, you pick one, we refine it. Final files are delivered in all required formats. For full package, we also create a Canva template kit so you or your team can make new posts easily while staying on-brand. |
| Deliverables | Logo in all formats (PNG, SVG, PDF — white & colour versions) · Brand color palette (HEX + CMYK codes) · Font selection & usage guide · Social media post template kit (10 templates) · Business card design · Menu / brochure / flyer design (Full package) · Brand style guide PDF                                 |

## 07 YouTube Growth & Livestream Management

MONTHLY

Monthly Recurring

**Price: INR 5,000/mo (basic support) — INR 8,000/mo (Shorts + SEO) — INR 10,000/mo (full management)**

■ Time Investment: Basic: ~10–14 hrs/month | Full Management: ~20–28 hrs/month

|              |                                                                                                                                                                                                                                                                                               |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tools Used   | YouTube Studio, TubeBuddy / VidIQ (SEO & analytics), Canva (thumbnails & banners), CapCut / DaVinci Resolve (light editing), OBS Studio (livestream setup)                                                                                                                                    |
| Timeline     | Channel setup / audit: 2–3 days   First upload support: within 5 days   Shorts pipeline: ongoing from month 1                                                                                                                                                                                 |
| What We Do   | We optimise your YouTube channel for search, design thumbnails that get clicks, write SEO titles & descriptions, create Shorts from your existing content or new short clips, and set up your livestream so you can go live for events, tours, puja ceremonies etc. without technical issues. |
| Deliverables | Channel art & banner design · About section optimisation · 4 custom thumbnails/month · Titles, descriptions & tags (SEO-optimised) · 2–4 YouTube Shorts per month · Livestream technical setup (OBS config + test stream) · Monthly analytics report (views, watch time, subscribers)         |

## 08 AI Business Automation

■ Time Investment: Basic: ~20–25 hrs | Advanced: ~40–60 hrs

|              |                                                                                                                                                                                                                                                                                                                                                                                                                              |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tools Used   | Make.com / n8n (workflow automation), Google Sheets / Notion (database), OpenAI API / Claude API (AI chatbot), WATI / AiSensy (WhatsApp integration), Gmail API (email alerts), Google Data Studio (dashboards)                                                                                                                                                                                                              |
| Timeline     | Discovery & flow mapping: Day 1–2   Build phase: Day 3–10   Testing: Day 11–12   Training & handover: Day 13–14                                                                                                                                                                                                                                                                                                              |
| What We Do   | The full automation flow: A new lead comes in (from ad, website or WhatsApp) → auto-reply sent instantly → lead saved to Google Sheets → your team gets a WhatsApp + email alert → task created for follow-up → if no response, Day-3 and Day-7 follow-ups sent automatically → AI bot handles common questions 24/7 → every Monday you get a report summary. You never miss a lead. Your team always knows what to do next. |
| Deliverables | Lead auto-capture → Google Sheets CRM → WhatsApp + email alert to team · Follow-up sequences (WhatsApp + email, multi-day) · Task auto-creation for team (Google Tasks / Notion) · AI chatbot for FAQ handling on WhatsApp (answers: price, availability, location) · Weekly automated report sent to your WhatsApp every Monday · Live dashboard (Google Data Studio) for leads, bookings, follow-up status                 |

## Why VrindavanDev?

|                                 |                                                                                                                             |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| ◆ <b>Local Market Expertise</b> | We know Vrindavan's seasonal cycles — Holi, Janmashtami, wedding season, pilgrimage peaks. Campaigns are timed accordingly. |
| ◆ <b>Hindi + English</b>        | All communication, reports and support in Hindi or English — whichever you prefer. No technical jargon.                     |
| ◆ <b>No Long Contracts</b>      | Monthly plans with 15-day cancellation notice. One-time projects with milestone-based payment. Zero lock-in.                |
| ◆ <b>WhatsApp-First Support</b> | All updates, reports, approvals and support via WhatsApp. No email threads, no waiting.                                     |
| ◆ <b>Transparent Pricing</b>    | What you see is what you pay. Domain, hosting, ad spend — all passed at actual cost. No hidden fees ever.                   |
| ◆ <b>Vrindavan References</b>   | Our work is visible locally. We can share case studies & references from Vrindavan/Mathura region clients.                  |
